---

It's good to have PC98 and FM-Towns version, EXCEPT the DOS version needs some mastering, for some tracks, it clips like crazy! And you should have also included MT-32 version! Who can deny that MT-32 was the best MIDI module of that time?

For players that want to hear MT-32 version, get yourself DOS\* version of the game, there will be a folder named MTMIDI. Inside you can find same MIDI files but tailored for MT-32. Grab and play them with MUNT MT-32 Emulator.

But still, I'd recommend the soundtrack. CFK, please include the MT-32 version!

Edit: \* apparently it's earliest Windows version, not DOS.. Very nice OST, each version of the soundtrack is laid out nicely on separate discs and tagged properly.

I would like a FLAC version but mp3 320 is acceptable especially with the sheer number of tracks ( $38 * 4 = 152$  tracks).
